

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION II  
EDISON, NEW JERSEY 08837

229602

October 18, 2010

Lynn Cuffee  
New York City Dept of Transportation  
Permit Management Office

Re: Jewett White Lead Site

Dear Ms. Cuffee:

The U.S. Environmental Protection Agency (EPA) plans to collect sediment/soil samples from the catch basins located immediately adjacent the former Jewett White Lead Site located at the corner of Richmond Terrace and Park Avenue in Port Richmond, Staten Island. There are a total of 3 catch basins (two on Park Avenue and one on Richmond Terrace) that will be sampled on October 29, 2010.

EPA collected soil samples from the 2000-2012 Richmond Terrace property, and found elevated levels of lead throughout most of the Site, both laterally and with depth. Off-site samples were collected from four locations along Richmond Terrace next to the Site in order to determine if contamination had migrated from the Site. Lead was detected in the off-site samples, albeit at lower concentrations than on the Site.

Included with this letter is a fact sheet explaining EPA's current and historical sampling at the former Jewett White Lead Site. If you have any questions or concerns, please contact me at (732) 452-6415.

Sincerely,

  
Kimberly Staiger  
On-Scene Coordinator

Enclosure

## APPLICATION FOR ROADWAY/SIDEWALK PERMIT(S)
